

"Easier positioning for patients and physicians"

Talking Sonesta chairs with Barb Brown, Nurse at Urocare Associates

Which model of the Sonesta chair are you using?

I am using the Sonesta 6202 chair.

For which patient situation are you using the Sonesta chair?

We use the Sonesta chair in our office for multiple reasons, for example: Cystoscopies, Urodynamic procedure, Botox injections, Pelvic Floor Rehab, difficult catheter changes, in office stent removal and occasional biopsy.

How many patients in a typical week are using the Sonesta chair?

The chair is used on a daily basis. This depends on the number of procedures scheduled. This will vary among the patient flow of each individual office.

What are some of the benefits of having a Sonesta chair?

Easier positioning for patients and physicians during procedures.

What do you like the most of the characteristics of a Sonesta chair when using it?

Getting the patient prepped/positioned in the Sonesta chair is a lot less difficult for the staff and the patient than using a regular examination table due to easy chair adjustments. For example, difficult catheter changes on elderly patients are much easier to do on the Sonesta chair due to the easy and multiple adjustment capabilities that chair has.

Do you think there is any time saving factors by using a Sonesta chair?

The chair can be adjusted easily to fit everyone's body and with this chair usually only one medical staff member is needed whereas using a regular examination table you may need multiple staff members to assist for comfort ability and access to the patient.

Will the chair make the procedure more tolerable/acceptable to the patient?

Yes, everyone has a different build and with the capability to adjust the chair to patient's comfort will make the procedure go smoother.

Will the use of the Sonesta chair make the procedure easier for you and your staff to perform?

Yes, the Sonesta chair makes procedures easier to perform due to the capability of adjusting the table into multiple positions which makes it easier for patient and medical provider.

What is your favorite feature of the Sonesta chair?

Easy positioning and the capability of seat exchange for multiple procedures.

If you could change or add anything to the chair what would that be?

We like everything about the Sonesta chair, but if I had to find a fault I would make an easier adjustment for the foot pedals.*

If you had to describe the Sonesta chair to someone what would you say?

The Sonesta chair is a great examination table that can be used for multiple purposes and is made to fit a variety of patients and easy to use.

What would you share with another nurse about the chair and its benefits if asked how can I Justify the cost?

The Sonesta chair has been beneficial for our office. The chair is used daily and provides comfort to the patient and the provider for performance for minor procedures. The chair is easy to use and it has been a positive purchase for our office.

** Barb has been notified that if she uses a lubricating spray once a week this will make the movement of the foot rests easier.*

The Sonesta 6202 chair is used daily at Urocare Associates.
