

"My Sonesta power chair is the most adaptable exam chair on the market"

Talking Sonesta chairs with Dr. Steven Beverly

For which patient situation are you using the Sonesta chair?

Originally the chair was placed in our procedure room for urodynamic studies, but because of the ability to have low or elevated heights it also became our chair for hysteroscopy and colposcopy procedures.

How many patients in a typical week are using the Sonesta Chair?

In our office 20-30.

What are some of the benefits of having a Sonesta chair?

The height range of this chair, with a very low starting point, which enables our disabled patients to get into the chair easily. The small footprint and wheels make it moveable. The attachments make it suitable for all patients in a gynecologist office.

What do you like the most of the characteristics of a Sonesta chair when using it?

Adaptability to urodynamics, procedures, colposcopy, or exams.

Will the chair make the procedure more tolerable/acceptable to the patient? How & why?

With all the possibilities of adjustments and the accessories you can make sure all patients are comfortable.

Will the use of the Sonesta Chair make the procedure easier for you and your staff to perform? How & why?

Yes it allows for almost infinite positioning, as the position of any patient can be optimized, making difficult cases doable.

What is your favorite feature of the Sonesta Chair?

The infinite positions made possible with the hydraulics in the chair.

Which accessories to the chair are you using most often and for which procedure?

Leg rests for procedures Essure and Novasure.

If you could change or add anything to the chair what would that be?

The seat has the cutout; at times it would be beneficial to have an insert to make the seat square across the end with no cutout.*

If you had to describe the Sonesta Chair to someone what would you say?

The most versatile exam chair on the market.

What would you share with another Dr. about the chair and its benefits if asked how can I justify the cost?

The biggest cost saver would be that this chair can be a regular exam table, colpo table, urodynamic's chair, procedure table, and ultrasound table. This can allow you to use your space more efficiently and rent less space without sacrificing comfort or functionality.

My Sonesta power chair is the most adaptable exam chair on the market. Its mobility allows us to move it, and configure the room to make whatever study we are performing, and done in the most efficient manner. Our previous power exam table is so heavy we had to work around it. The Sonesta chair also starts at a very low height which aids our elderly patients in getting on the chair. When you add the footrests, and leg rests this chair can be used for any patient in our office. We use it for colposcopy, ultrasounds, hysteroscopy, as well as gynecological exams. If you are limited on space this chair can truly improve efficiency.

Steven Beverly, M.D., M.S., FACOG

** After this interview Dr. Beverly learned that Sonesta has a non-cutout seat as an optional accessory. Article number 524-6365. Dr. Beverly has ordered one and is very happy.*

About Dr. Beverly

Dr. Beverly is committed to using the least invasive treatments and techniques to allow women to experience faster recoveries and less pain, whether it be in office permanent contraception (ESSURE), office treatments for abnormal bleeding (Novasure), incontinence treatments (including InterStim), or hospital surgeries (laparoscopic/da Vinci). He is passionate about offering patients cutting edge options for their health. Together with his patients, Dr. Beverly makes every decision a team decision - it is all about we, not me!
